

Physical Therapy Referrals

Agile's in-clinic physical therapy gets injured patients back to life quickly

Being injured is never ideal but getting injured on the job can be an extra headache. PT is the first step on the road to recovery so injured workers can return to work and life, pain-free as quick as possible.

Whether your patient is recovering from an on the job injury or suffering from chronic aches and pains, our physical therapy team can help. We use an attentive, one-on-one approach to help them get on the road to a faster and more thorough recovery and closely communicate coordination of care with medical referral sources to ensure the best patient outcomes.

Our licensed physical therapists and physical therapist assistants focus on relieving pain, restoring function and strengthening the areas causing difficulty through early manual therapy, therapeutic exercise, neuromuscular re-education, and functional activity. For work injuries, we focus on job replication and return to work with a graded integration approach.
